PROFESSIONAL SUMMARY

Motivated Software Engineering graduate with strong skills in Java, Spring Boot, Microservices, React.js, SQL, REST APIs, and full-stack web development. Experienced in building scalable web applications and applying SDLC and Agile practices. Seeking an entry-level Software Engineer or Java Developer role to contribute to innovative software solutions.

TECHNICAL SKILLS

Programming Languages: Java, SQL, JavaScript

Frontend Technologies: React.js, HTML5, CSS3, JavaScript, Bootstrap, Axios

Backend Technologies: : Core Java, Spring Boot, RESTful APIs, Microservices, JPA/Hibernate, JDBC

Database: MySQL

Tools & Platforms: Git, GitHub, Maven, Postman / Thunder Client, VS Code

Core Concepts: Object-Oriented Programming (OOP), JDBC, SDLC, Agile Methodologies, Debugging, Microservices

PROFESSIONAL EXPERIENCE

Full-Stack Developer Intern (Java) — Saiteja Infotech Private Limited

2026-present

Tirupati / Remote

- Engineered and optimized 8 core HRMS modules using Java, Spring Boot, React.js, and MySQL, handling data records for 50+ active enterprise profiles.
- Redesigned 8 key operational modules (Attendance, Payroll, Leave Management, Performance, Onboarding), improving UI responsiveness and reducing navigation steps by 25%.
- Developed and integrated 15+ RESTful APIs via Axios with robust error-handling, achieving seamless state management and reducing payload load times by 15–20%.
- Debugged frontend, backend, and database issues involving API failures, foreign-key constraints, routing, authentication, and data inconsistencies.
- Worked with JPA/Hibernate and MySQL to manage relational HRMS data and troubleshoot database-related issues.
- Collaborated with team members to analyze requirements, develop features, resolve bugs, and deliver project updates using Git/GitHub.

PROJECTS

BookMyDoc – Healthcare Appointment Booking Platform — [GitHub](#)

Tech Stack: React.js, Java, Spring Boot, Microservices, MySQL, REST APIs **Role:** Fullstack Developer

- Developed a full-stack healthcare appointment booking platform using React.js and Spring Boot Microservices.
- Implemented User and Doctor modules with authentication and role-based workflows.
- Built RESTful APIs for doctor management, appointment booking, availability management, and appointment status tracking.
- Integrated API Gateway and Eureka Service Registry to enable service discovery and centralized routing.
- Designed responsive dashboards for patients and doctors to manage appointments, slots, and healthcare workflows.
- Applied Microservices Architecture principles to create scalable and maintainable backend services.

Smart Assistive Navigation System for Visually Impaired Persons

Tech Stack: IoT, Microcontroller Programming, Ultrasonic Sensors, Embedded C **Role:** System Developer

- Developed an IoT-based wearable device with real-time obstacle detection using ultrasonic sensors and vibration haptic feedback.
- Programmed microcontroller logic for precise distance threshold detection and multi-level haptic alert triggering.
- Integrated an automated email alert system for caregiver notification during emergency events.
- Key Outcome: Fully functional assistive prototype demonstrating end-to-end system design, real-time processing, and quality validation.

EDUCATION

B.Tech, Electronics & Communication Engineering — Eluru College of Engineering and Technology

2022 – 2025

CGPA: 7.5

Diploma, Electronics & Communication Engineering — Sir C.R. Reddy Polytechnic College

2019 – 2022

CGPA: 7.4

INTERNSHIPS & CERTIFICATIONS

Infosys Springboard – Programming using Java —

2026

- Gained hands-on experience in Core Java, OOP principles, exception handling, and collections framework.
- Applied Core Java concepts through coding exercises and practice assignments, strengthening problem-solving and debugging skills.

AICTE – Google Generative AI Virtual Internship —

2025

- Explored foundations of Generative AI, large language models, and practical AI application development.
- Worked on AI-powered problem-solving exercises and modern AI tool integration.

STRENGTHS

- Strong problem-solving and analytical skills
- Quick learner with the ability to adapt to new technologies and tools
- Effective team player with good communication and collaboration skills
- Strong attention to detail and commitment to delivering quality work
